Communication is sending and receiving messages through verbal or nonverbal means, including speech, or oral communication; writing and graphical representations (such as

[Optimal Slicing of mmWave Micro Base Stations for 5G and Beyond](#)

Network slicing is a fundamental approach that involves segregating and allocating network resources distinctly to a group of users based on their individual needs, and it is widely recognized as an

What is Communication?

What is Communication? At its foundation, Communication focuses on how people use messages to generate meanings within and across various contexts, and is the discipline that studies all forms,

Communication

Communication is commonly defined as the transmission of information. Its precise definition is disputed and there are disagreements about whether unintentional or failed transmissions are included and

[Movable Base Stations in Mobile Networks for Emergency](#)

There are two possible solutions for a rapid deployment of a mobile network in such scenarios. The first one is to install fixed base stations (FBS), as it is common in commercial mobile networks.

[Optimization Control Strategy for Base Stations Based on](#)

Abstract: With the maturity and large-scale deployment of 5G technology, the proportion of energy consumption of base stations in the smart grid is increasing, and there is an urgent need to reduce
