[How is solar energy converted into electricity](#)

Through a process known as photovoltaic (PV) conversion. In this process, solar panels made of silicon or other semi-conductive materials. Absorb the sun's

Solar explained

When the sun is shining, PV systems can generate electricity to directly power devices such as water pumps or supply electric power grids. PV systems can also charge a battery to provide

[How do solar panels work? Solar power explained](#)

Solar cells are typically made from a material called silicon, which generates electricity through a process known as the photovoltaic effect. Solar
