

Liquid-cooled battery cabinet constant temperature control technology

Overview

The solution to this challenge is the advanced Liquid Cooling Battery Cabinet, a technology designed to provide precise and uniform temperature control, ensuring optimal performance and extending the lifespan of the entire energy storage system.

From compact 3kW units for commercial applications to comprehensive liquid cooling infrastructure for grid-scale deployments, effective thermal management enables the safe, efficient, and reliable

Optimized design of dual-circuit dynamic coordinated control for liquid

Dual-circuit dynamic cooling enables precise temperature control, maintaining battery packs within normal range.
