[Building resilience: Concrete actions for global leaders](#)

Resilience pioneers on climate, energy and food are Siemens with its self-sustainable, renewable microgrid technology for isolated communities; the World Food Programme with the Sahel

[These Dutch microgrid communities can supply 90% of their energy](#)

Local communities generating their own power could become 90% energy self-sufficient, with potential to be fully self-reliant in the future, according to a Dutch study.

[What are microgrids - and how can they help with power cuts?](#)

Microgrids can step in when the main electricity grid fails. And as they can be powered by renewables, they are a sustainable and affordable option, too.

[The small island states making big strides towards net zero](#)

Pacific small island states, contributing only 0.03% of global emissions, are leading with ambitious renewable energy projects and net-zero goals by 2050.

[A comprehensive review of standards for distributed energy resource](#)

In our paper, we comprehensively review the standards development and current situation of microgrids and DER grid-integration issued by international organizations or individual

countries.

[Microgrid Testing and Control Standards Briefing: An](#)

SEPA hosted a briefing for Microgrid Controller Standards IEEE 2030.7(C) and IEEE 2030.8(C) to provide an overview of the standards and explore the challenges

[This bike path in the Netherlands is made from plastic waste](#)

Dutch cyclists rode down the world's first bike path made entirely of discarded plastic this week, in a move aimed at reducing the millions of tonnes wasted every year.

[How to finance battery energy storage , World Economic Forum](#)

Battery energy storage systems can address the challenge of intermittent renewable energy. But innovative financial models are needed to encourage deployment.

[How buildings can solve energy security as demands surge](#)

Surging energy demands and prices of buildings are turning leaders to efficiency retrofits to reduce energy costs and improve long-term energy security.

[Microgrids can secure electricity supply during disasters , World](#)

Renewables-based microgrids and peer-to-peer (P2P) energy trading can boost energy security as they are self-sufficient and run independent of large grids.

Microgrid Overview

While pairing a solar photovoltaic system with energy storage to support a single building (behind the utility meter) may be considered a small microgrid by some, for the purposes of this document we

[5 facts you should know about the Strait of Hormuz](#)

Normally, a fifth of global gas and oil trade passes through this chokepoint. That's 20 million barrels of oil a day. But why are people talking so much about this one small waterway - and how

[The start-up tackling Nigeria's reliable power challenge, World](#)

Amid an electricity crisis, many Nigerian small businesses run on petrol generators. This solar-microgrid start-up is working to connect them to clean energy.
