

Mobile base station equipment power system design

Mobile base station equipment power system design

[Optimum sizing and configuration of electrical system for](#)

This study develops a mathematical model and investigates an optimization approach for optimal sizing and deployment of solar photovoltaic (PV), battery bank storage and a diesel

DC20161020.doc

The special environment and working condition of the mobile base station determines the special requirements of the mobile base station communication power system, combined with the

[Mobile base station power supply configuration and calculation](#)

An improved base station power system model is proposed in this paper, which takes into consideration the behavior of converters. And through this, a multi-faceted assessment criterion that considers both
