

# Off-grid solar-powered containerized aquaculture in Norway

## Overview

---

It's called Ocean Bloom -a floating greenhouse that grows vegetables, raises fish, and generates clean energy all in one integrated system. This futuristic platform floats gracefully on the ocean's surface, harnessing the power of water, wind, and sun to support a self-sustaining.

## Off-grid solar-powered containerized aquaculture in Norway

---

[Norway project combines offshore wind power with](#)

Project combines offshore wind power with sustainable aquaculture, aiming to produce 6,000 tons of fish annually from the integrated systems.
