

Principle of intelligent power generation in communication base stations

Overview

Our model considers various factors, including base station traffic conditions, weather, and EV charging behavior. This paper introduces an incentive mechanism for setting charging prices and employs a deep reinforcement learning-based method for battery scheduling.

Principle of intelligent power generation in communication base sta

[Towards Integrated Energy-Communication-Transportation Hub:](#)

An effective method is needed to maximize base station battery utilization and reduce operating costs. In this trend towards next-generation smart and integrated energy-communication-transportation (ECT)
