

Pulse uninterruptible power supply

Overview

Our uninterruptible power supplies are available with capacitor storage or VRLA batteries. The DC-UPS with integrated electrochemical double layer capacitors are fully maintenance free and guarantee an uninterrupted power supply for periods measured in seconds.

Pulse uninterruptible power supply

DC-UPS , Uninterruptible power supplies

The reliable DC-UPS from PULS ensure highest system availability. The uninterruptible power supplies are available with capacitor storage or VRLA batteries.

Heart arrhythmia

Soon the person's breathing and pulse will stop. Ventricular fibrillation is an emergency that needs immediate medical help. It's the most frequent cause of sudden cardiac death. If this

How fit are you? See how you measure up

Checking pulse over the carotid artery To check your pulse over your carotid artery, place your index and third fingers on your neck to the side of your windpipe. When you feel your pulse, look

Heart rate: What's normal?

A normal resting heart rate for adults ranges from 60 to 100 beats per minute. A heart rate above or below that may signal a health condition.

Tachycardia

Tachycardia (tak-ih-KAHR-dee-uh) is the medical term for a heart rate over 100 beats a minute. Many types of irregular heart rhythms, called arrhythmias, can cause tachycardia. A fast

[PULS , No. 1 manufacturer of DIN rail power supplies](#)

The PULS group is your partner for DIN rail power supplies, decentralised Field Power Supplies & wireless charging technology from Wiferion.

Low blood oxygen (hypoxemia)

A medical device that clips to the finger, called a pulse oximeter, measures oxygen saturation. Healthy pulse oximeter values range from 95% to 100%. Values under 90% are low.

[Cardiopulmonary resuscitation \(CPR\): First aid](#)

Cardiopulmonary resuscitation (CPR) is an emergency treatment that's done when someone's breathing or heartbeat has stopped. For example, when someone has sudden cardiac

[Pulse pressure: An indicator of heart health?](#)

Checking your pulse pressure may help your care team predict your risk of heart and blood vessel events, such as heart attacks and strokes. A pulse pressure greater than 60 is a risk

Tachycardia

Ask your care team: How to take your pulse and what heart rate is best for you. When and how to do treatments called vagal maneuvers, if appropriate. When to seek emergency care.

How to take your pulse

Taking your pulse using your radial artery Use the tips of your index and middle fingers to feel the pulse in your radial artery. This is the area between your wrist bone and the tendon on the

[Novel pulsed field ablation offers patients safer and faster atrial](#)

Cardiologists in Mayo Clinic's Heart Rhythm Services are performing safe and successful ablation in patients using a novel energy source. The FDA-approved pulsed field ablation (PFA) for

Uninterruptible Power Supply

With more than 50 years of experience in delivering high-performance solutions, our systems are built to provide consistent and reliable UPS power during outages, voltage fluctuations and other
