

Solar panels can generate electricity and unplug wires

Overview

A solar panel is made of photovoltaic cells that turn solar energy into electricity. Sunlight reaches the solar cell which releases an electron, that electron that goes through the wires and cables to give power to a microwave, a TV, or anything else you've connected.

Always leave the battery connected to the charge controller before adding or removing solar panels. Your charge controller will die if it receives power from the solar panels and no battery is connected.

Solar Energy

There are two main types of solar energy technologies-photovoltaics (PV) and concentrating solar-thermal power (CSP). On this page you'll find resources to learn what solar
