Overview

Solar panels convert sunlight to electricity via the photovoltaic effect: photons excite electrons in silicon, a p-n junction creates directional current flow, and metal contacts collect DC power. An inverter converts DC to AC for use in buildings.

The magic of photovoltaic panels

[What are "magic numbers" in computer programming?](#)

Magic numbers are special value of certain variables which causes the program to behave in an special manner. For example, a communication library might take a Timeout parameter

[What are magic numbers and why do some consider them bad?](#)

What is a magic number? Why do many programmers advise that they be avoided?

[Solar energy basics: The magic of photovoltaic panels](#)

Solar panels use a curious bit of science called the photovoltaic effect to convert one form of energy into another. Here's how solar panels harvest light,

Photovoltaics and electricity

At a high level, solar panels are made up of solar cells, which

[KeyError: 'DEFAULT' when attempting to create a table using magic](#)

Point of clarification in regards to the first sentence of text: %%sql is a cell magic and not a line magic. It is sort of referenced here where that syntax like you are trying to use is displayed
