

United kingdom first solar

Overview

9 MW Larks Green solar farm is the first in the UK to be directly connected to National Grid's high voltage transmission network, with previous solar projects having been simply connected to their local Distribution Network Operator's system.

Belectric UK and First Solar, Inc. have connected the United Kingdom's largest solar farm to the grid.

Solar power in the United Kingdom

OverviewSolar potentialHistoryRooftop solarLarge-scale solar farmsPlanning considerationsGovernment programmesFuture

Solar power has a growing role in electricity production in the United Kingdom, contributing around 5% of the UK's annual power generation in 2024. As of 2025 , on sunny days, it provides over 30% of the UK's power consumption at times. There were few installations until 2010, when the UK government mandated subsidies in the form of a feed-in tariff (FIT), paid for by all electricity consumers. In the followin
