Voltage of photovoltaic connected inverter

How much voltage/current is "dangerous"?

Likewise, if the current and voltage are below a certain level, a person can--given enough time--safely absorb an arbitrarily large amount of electrical energy. Further, if voltage is sufficiently low, the

24V truck battery

A float charging voltage for 12V lead acid battery is 13.8V (2.25V to 2.3V per cell). In a 24 system you have to multiply by two, which gives 27.6V. However the battery can be charged also
