

What is a solar power plant

Overview

A photovoltaic power station, also known as a solar park, solar farm, or solar power plant, is a large-scale grid-connected photovoltaic power system (PV system) designed for the supply of merchant power. They are different from most building-mounted and other decentralized solar power because they supply power at the utility level, rather than to a local user or users. Utility-scale solar i. HistoryThe first 1 MWp solar park was built by Arco Solar at Lugo near , at the end of 1982, followed in 1984 by a 5.2 MWp installation in. Both have since been decommissioned (although.
