[How to Calculate the time of Charging and Discharging of battery?](#)

How do I calculate the approximated time for the Charging and Discharging of the battery? Is there any equation available for the purpose? If yes, then please provide me.

[Why is charging with Lithium batteries with a small load dangerous](#)

I'm well aware of the best practices for charging lithium chemistry batteries, and how the charges themselves work. I've never had a water tight explanation on why having a load on a battery

[Power Storage Battery Cabinet Voltage: The Backbone of Modern](#)

Let's face it - when was the last time you thought about the voltage in your phone's battery? Probably when it died during that important Zoom call. Now imagine scaling that frustration

[What is the maximum charging voltage of a Li-Ion battery?](#)

I will design a charging circuit for an ICR26650 3.7 V Li-Ion battery. I'm considering using the BQ24070 chip in the design. The battery charging voltage of this chip is given as 4.2 V.

Question How long should you wait after usage before charging? For example, if I use a battery powered string-trimmer or lawn-mower and the battery has gone empty (and probably quite warm,) how long

[How can I tell charge-only USB cables from USB data cables?](#)

I'd throw out all the "charge-only" cables. As the other answers have indicated, charging over a cable with the data lines disconnected is slow at best, and overloads the port at worst. If you want to inhibit

[Creating a 12.6 V 3S Lithium-ion Charging Circuit from 5 V USB-C](#)

I am constrained to the following: 3S lithium-ion battery of 2600 mAh charging at 1 A, USB-C connector with 5 V, the BMS is already included with the battery. My main question is if this

It will just make much more sense to buy a Type-C PD charger if your devices support it, rather than still dealing with the problem of which USB adapters you can use to convert to Type-C
