

What is the normal indoor temperature of the battery cabinet

Overview

For optimal battery performance, battery room HVAC systems should be designed to maintain a uniform average ambient room temperature of 77° F. Battery room temperatures below 77° F increase battery life but degrade battery performance during periods of heavy discharge.

The service life of the battery is closely related to its ambient temperature. Generally, the internal and external temperature is set between 25 and 30°C.

[Do Lithium Ion Batteries Require A Battery Room? Storage](#)

Temperature Control: Temperature control is essential for the safe storage of lithium-ion batteries. These batteries should be kept in a cool, dry place, ideally at temperatures between 15°C

Battery Room

Since battery capacity and performance is affected by temperature, a stable ambient temperature of 20°C is sought within the battery room. It is at this temperature that the batteries are rated, although
