The energy efficiency and consumption of mobile networks have received increasing attention from academics and industry in recent years. This has been provoked by rapid increases in mobile data traffic.

## Why is the electricity fee of 5g base stations too high

### [Energy Saving and Digital Management for 5G Base Stations](#)

In addition to high electricity costs, power provisioning is a challenge. Because 5G loads are about three times higher than 4G, existing 4G distribution systems may be insufficient.
